IMPROVEMENTS

1. The B-Pillar plug for the removable seat base, which allows for the harness to be removed from the Van, is no longer an obstruction.
2. Door open switch: self-contained weatherproof switch prevents corrosion and debris from entering switch-eliminating problems with switch sticking.
3. Motor mount: Upper motor mount redesigned. New design allows for structural integrity of front radiator support to remain OEM.
4. Praun electronic controller: Implemented new software to control amperage to ramp. Improving ramp function and speed.
5. Ground effect: Redesigned for better fit and appearance.
6. Oval exhaust: Allows for 5" ground clearance at exhaust full length of vehicle.
7. Payload capacity sticker.
8. Improved kneeling feature quickens kneeling process.
9. Rear set base lowered and footrests removed.
10. Improved removable front seat bases.
11. New power ramp.
12. Electrical fuse panel with ignition or direct battery power for use with EZ-lock or other electrical add ons.
13. Seat anchor plates allow for easy installation of EZ-Lock mounting plate.
14. EZ-Lock mounting plate is offered as option.
